Indexes to Volume 18 (1983)

The abbreviation (R) is used after the page concerned to indicate Reviews

Subject Index

Acoustic emission and fatigue crack growth in rigid polyurethane foam, 1827

Acoustic emission from graphite/epoxy composite laminates with special reference to delamination, 2503

Activation energy spectra and relaxation in amorphous materials, 278

Ageing of austenitic iron alloys containing nitrogen, 2951

Alkali treatment of coir fibres for coir–polyester composites, 1443

Alkylated polymers as lube oil additives, 1638

Analysis of layer structure of boronized steel surface by conversion electron Mössbauer spectrometry (CEMS), 1887

Analysis of oxalate coating on steels by conversion electron Mössbauer spectrometry, 1751

Analytical and graphical evaluation of local quasi-stable angular points during ion bombardment at oblique incidence, 3562

Analytical technique for the determination of solidification rates during the inward freezing of cylinders, 3578

Applicability of Weibull analysis for brittle materials, 2765

Application of discontinuous fibre-reinforced composite theory to polybutene-1 films containing needle crystals, 1719

Application of the plane simple shear test for determination of the plastic behaviour of solid polymers at large strains, 903

Application of X-ray photoelectron spectroscopy to the study of polymer-to-metal adhesion Part 1 Polybutadiene coated mild steel. The, 2987

Architecture and function of cuttlefish bone. On the, 2081

Assessment of a novel method of improving the characteristics of electrical steels by a surface diffusion technique, 1650

Bending properties of creased zones of paperboard related to interlaminar defects, 1365

Calcination of precipitated $Mg(OH)_2$ to active MgO in the production of refractory and chemical grade MgO, 637 (R)

Calculation of the forming limit curve at fracture, 1794

Carbonization of blends of pitches and resins to produce anisotropic carbon and the effects of pressure. The, 991

Characterization of AlN ceramics containing long-period polytypes, 525

Characterization of impact-modified nylon 66, 3551

Characterization of the current-blackening phenomena in scandia stabilized zirconia using transmission electron microscopy, 2255

Chemical preparation of ultra-fine aluminium nitride by electric-arc plasma, 2011

Chemical stress cracking of acrylic fibres, 2517

Chemically-assisted fracture of thermoplastic PET reinforced with short E-glass fibre, 2923

CNDO studies on nonplanar conformations in some *cis*- and *trans*-polybenzobisoxazoles and polybenzobisthiazoles, 1119

Cohesive and adhesive strength of ice. The, 1455

Comment on "Craze growth and craze interactions", 634

Comments on "Long term growth of γ' particles", 1895

Comments on "Mechanical strengthening and impurity precipitation behaviour for divalent cation-doped alkali halides", 2844

Comparative study of the temperature dependence of hardness and compressive strength in ceramics, 1666

Comparison of the performance of AISI 52100 and AISI 440C ball bearings in a corrosive environment. A, 3611

Compression fracture statistics of compacted cement cylinders, 2947

Compressive failure modes of alumina in air and physiological media, 3571

Computer simulation of polyethylene crystals Part 1 Method, structure and elastic constants for perfect crystals, 853

Computer simulation of polytheylene crystals Part 2 The boundary properties of twins and stacking faults, 864

Computer simulation of polyethylene crystals Part 3 The core structure of dislocations, 884

Concurrent grain growth corrections during creep of fine-grained materials, 781

Conduction parameters in chemically deposited thin silver films, 2414

Considerations of solute-drag in relation to transformations in steels, 1473

Contribution of texture to the strengthening and fracture in hot-rolled magnesium–12.7 at % cadmium alloy 2385

Correlation between solid–particle erosion and fracture parameters in SiC. On the, 1491

Correlation of hardness and microstructure in unoriented lamellar polyethylene Part 2 Study of elastic modulus, 1077

Creep of ceramics Part 1 Mechanical characterisitcs, 1 (R)

Creep of Kevlar 49 fibre and a Kevlar 49–cement composite, 2939

Critical examination of the DTA techniques used to study the kinetics of solid-state transformations, 2117

Cross-slip on the first order pyramidal plane $(10\bar{1}1)$ of A-type dislocations $[1\bar{2}10]$ in the plastic deformation of α-titanium single crystals, 2613

Crystallization characteristics of an amorphous $Ti_{80}Si_{20}$ alloy at high pressure, 3765

0022–2461/83 $03.00 + .12 © *1983 Chapman and Hall Ltd.*

Crystallization characteristics of amorphous Fe–Si–B alloys, 2163
Crystallization of amorphous $Ni_{60}Nb_{40}$, 804
Crystallization of Fe–P amorphous alloys as studied by the EDXD method, 1515
Crystallization of the metallic glass $Fe_{80}B_{12}Si_8$, 2297
Crystallographic orientation relationships in the tin–lead–cadmium ternary eutectic, 51

D.C. electrical conductivity of amorphous Si_3N_4–C composites prepared by chemical vapour deposition, 383
Debye–Waller parameter of palladium metal powders, 1803
Decomposition processes in Al–Zn–Mg alloys, 2215 (R)
Density and deposition rate of chemically vapour-deposited Si_3N_4–TiN composites, 2401
Deterioration of sodium ion conductors under applied stress. The, 1590
Dielectric and piezoelectric properties of modified lead titanate zirconate ceramics from 4.2 to 300 K, 968
Dielectric behaviour of Mg–Al–Si, Ca–Al–Si, Y–Al–Si and Nd–Al–Si oxynitride glasses. The, 1725
Diffusion studies of porous materials Part 3 Effects of thermal and radiolytic oxidation on the pore structure of an AGR moderator graphite, 593
Direct current electrical conductivity of doped gamma ferric oxide, 3415
Disentanglement time of the craze fibrils in polymethylmethacrylate. The, 3004
Dissociation of lattice dislocations in coincidence boundaries, 1183
Dynamic fatigue of brittle materials containing indentation line flaws, 1306

Effect of additive elements on cold workability in FeCo alloys, 1709
Effect of alumina and monoclinic zirconia on the electrical conductivity of Sc_2O_3–ZrO_2 compositions, 3230
Effect of aluminium on mechanical properties and thermal stability of (Fe, Ni)–Al–P ternary amorphous alloys. The, 753
Effect of carbon on mechanical properties in $Fe_{0.5}Co_{0.5}$ alloys, 2047
Effect of cold rolling on the mechanical properties of an FeCo–2V alloy, 3437
Effect of cold work on anodic polarization of low carbon steel, 2732
Effect of cure on thermally stimulated discharge measurements in epoxy resin coatings. The, 2817
Effect of dispersoids on the micromechanisms of crack extension in Al–Mg–Si alloys. The, 1224
Effect of grain size on deformation twinning in a textured zinc alloy. The, 2419
Effect of heat treatment on plane strain fracture of glassy polymers. The, 2826
Effect of heat treatment temperature (HTT) on density, weight and volume of glass-like carbon (GC), 2671
Effect of high pressure on interdiffusion in an Al–Mg alloy, 2679
Effect of hydrogen on electrical transport properties of polycrystalline $CuInTe_2$ thin films, 815
Effect of IIIB and IVB elements on the superconducting properties of zirconium-based amorphous alloys. The, 439
Effect of impurities on the densification of rubber-bonded silicon nitride (RBSN). The, 3721
Effect of impurities on the diffusion-controlled creep activation energy in MgO, 2283
Effect of intercritical quenching on microstructure and tensile properties of steels 15 and 15Mn2Nb, 2727
Effect of interfacial adhesion on the mechanism for craze formation in polystyrene–glass bead composites. The, 3281
Effect of material parameters on the erosion resistance of brittle materials, 766
Effect of microstructure and stress state on the fracture behaviour of wood. The, 2181
Effect of quenched-in vacancies on the martensitic transformation. The, 3213
Effect of silane coupling agents on mechanical and thermal properties of polyester resin concrete, 1506
Effect of stress triaxiality on neck propagation during the tensile stretching of solid polymers, 1731
Effect of substrate temperature, deposition rate and annealing on the electrical resistivity of thin yttrium films. The, 3177
Effect of swaging on the 1000° C compressive slow plastic flow characteristics of the directionally solidified eutectic alloy γ/γ'-α, 2581
Effect of the transport properties of epoxy based coatings on metallic substrate corrosion. The, 1977
Effect of vacuum-treatment on mechanical properties of W–Ni–Fe heavy alloy, 1374
Effects of calcination upon properties of needles-cokes, 3695
Effects of extensional creep and creep recovery on the dynamic properties of an unfilled and filled cross-linked polyester resin. The, 1482
Effects of pressure on the carbonization of pitch and pitch/carbon fibre composites. The, 978
Effects of subgrain structures and stress orientation on fatigue of brass, 3749
Effects of water and bleaching on the mechanical properties of cellulose fibre cements, 2156
Effects of water on glass-filled methacrylate resins, 2957
Efficiency of some silane coupling agents and of the method of their application in polyester resin concrete, 3599
Elastic moduli of tellurite glasses. The, 1264
Electrical behaviour of doped-yttria stabilized zirconia ceramic materials, 1315
Electrical conduction in some vanadate glasses, 3305
Electrical conductivity and dehydration steps of gel-grown $CdC_2O_4 \cdot 3H_2O$, 57
Electrical conductivity of polycrystalline tin dioxide and its solid solution with ZnO, 2101
Electrical conductivity of Sc_2O_3–ZrO_2 compositions by 4-probe d.c. and 2-probe complex impedance techniques, 3117
Electrical conductivity of single crystal nickel tungstate, 1540
Electrical conductivity studies of some chalcogenide glasses over a large temperature range, 717
Electrical resistivity of ferrites of the general formula $Mg_{1+t}Fe_{2-2t}Ti_tO_4$ ($t = 0.1, 0.3, 0.4, 0.5$), 2890

Electrical transport in new Ti_2OCl_2 and Ti_4Cl_4, 3348
Electron microprobe analysis of phase segregation in the Heusler alloy $Cu_{2.00}Mn_{1.00}Al_{1.00}$, 3079
Electron microscopic investigations on a melt-quenched Al–Rh alloy, 3011
Electron microscopic observation of diamond particles grown from the vapour phase, 1785
Electron microscopy and magnetic properties of Fe–Cr–Co–Si permanent magnet alloys manufactured by rolling–ageing technique, 1681
Electron microscopy of banded structures in oriented thermotropic polymers, 1143
Embrittlement of P/M X7091 and I/M 7175 aluminium alloys by mercury solutions, 1872
Environmental stress corrosion cracking of glass fibre-reinforced laminates and single E-glass filaments. The, 1059
EPR study of the pressing process of polycrystalline MgO, 245
ESR study at various microwave frequencies of amorphous and polycrystalline $ZnO \cdot xV_2O_5$ system, 1993
ESR study of the photoreactivity of TiO_2 pigments. An, 289
Etching of chemically vapour-deposited amorphous Si_3N_4–C composites in HF solution, 3387
Evaluation of microstructural instability during differential strain rate test of a superplastic alloy, 2063
Experimental investigation of the orthogonal (diamond) grain configuration in high temperature fatigue. An, 3219

Fatigue crack advance mechanisms in polymers: rubber toughening mechanisms in blends of poly(2,6-dimethyl–1,4-phenylene oxide) and polystyrene, 1836
Fatigue crack growth rates for very short cracks developing at fastener holes in 7075 and 7010 aluminium alloys, 1852
Fatigue-crack initiation in IMI 829 caused by high-temperature fretting, 493
^{55}Fe diffusion in magnetite crystals at 500° C and its relevance to oxidation of iron, 2371
Fibre–matrix interface effects in asbestos–cement composites, 2200
Flexible inorganic films and coatings, 545
Fluoride-based etchants for quartz, 304
Fluxing of protective oxide scales on superalloys via a thermal surface tension gradient, 3743
Formation and characterization of oxynitride glasses in the Si–Ca–Al–O–N and Si–Ca–Al, B–O–N systems, 2087
Formation and crystallization of Al–Fe–Si amorphous alloys, 1195
Formation mechanism of cBN crystals under isothermal conditions in the system $BN–Ca_3B_2N_4$, 3054
Formation of cadmium stannates studied by electron spectroscopy, 3679
Formation of metastable monoclinic rare earth sesquioxides from the melt, 1341
Formation of NbC and TaC solid-state reaction, 1291
Fracture behaviour of a single-fibre graphite/epoxy model composite containing a broken fibre of cracked matrix, 447
Fracture behaviour of collimated thermoplastic poly(ethylene terephthalate) reinforced with short E-glass fibre, 2029
Fracture in potatoes and apples, 2017
Fracture mechanics analysis of polypropylene/rubber blends. A, 2319
Fracture mechanisms in microstrength testing of carbon artifacts, 3712
Fracture of LiF bicrystals, 1765
Fracture of metastable tetragonal zirconia crystals, 2618
Fracture of notched polycarbonate under hydrostatic pressure, 1947
Fracture of particulate-filled epoxide resins Part 1. The, 208
Fracture toughness of composite adherend adhesive joints under mixed mode I and III loading, 2274
Fracture toughness of polybutadiene at cryogenic temperatures, 3756

Generation of thermal strains in GRP Part 1 Effect of water on the expansion behaviour of unidirectional glass fibre-reinforced laminates, 1522
Generation of thermal strains in GRP Part 2 The origin of thermal strains in polyester cross-ply laminates, 1533
Grain boundary Cr-depleted zones in Ti and Nb stabilized austenitic stainless steels, 793
Grain boundary segregation in bright nitrided α-irons alloyed with chromium, molybdenum and silicon, 3421
Growth and morphology of cadmium oxide whiskers, 623
Growth and surface topography of cadmium films, 3606
Growth kinetics of monofilamentary Nb_3Sn and V_3Ga synthesized by solid-state diffusion, 1165
Growth of $Ca_xSr_{1-x}C_4H_4O_6 \cdot 4H_2O$ mixed crystals and their characterization, 416
Growth of $Co_{1-x}Fe_xTiO_3$ single crystals, 894

Hardness of $PbO–ZnO–B_2O_3$ glasses. The, 2466
Heat evolution investigated by a liquid crystal film technique during fracture in metals, 1645
Heat treatment of cast Co–Cr–Mo for orthopaedic implant use, 391
High performance wrought nickel base-superalloy EI-929. A, 2915
High resolution X-ray diffraction of fully and partially magnesium stabilized beta"-alumina ceramics, 2437
High temperature compressive behaviour of as-cast Al–Cu alloys of varying composition, 3031
High temperature creep behaviour of lead-base particulate composites, 140
High temperature internal oxidation behaviour of dilute Ni–Al alloys, 1389
High temperature steady-state creep of polycrystalline rutile, pure and doped with tantalum, 1698
High temperature uniaxial tensile stress rupture strength of sintered alpha SiC, 1967
High-temperature fracture of hot-pressed AlN ceramics, 503
Hot alkali stable materials with low electrical resistance: a new composite made from porous asbestos and soluble polyphenylene sulphide, 3311
Hot hardness of cementite, 225
Hydrophilic polymeric membranes obtained by radiation

cast-copolymerization of ethyl acrylate with various monomers, 1335
Hydrostatic pressure derivaties of the elastic constants of bismuth alloys. The, 2337
Hydrothermal synthesis of mixed phosphates of neodymium and alkaline metals ($Me_2O{\cdot}Nd_2O_3{\cdot}4P_2O_5$), 703
Hygrothermal ageing and fracture of glass fibre–epoxy composites, 3404

Imaging of polyethylene films by diffraction contrast, 1999
Impact strength of En8 steel diffusion bonds, 1433
Improvement of magnetic properties of electrical steels using a surface diffusion technique, 1657
Impurity effects of polymorphism in GeO_2 by DTA, 1863
Increase of crack resistance during slow crack growth in Al_2O_3 bend specimens, 265
Increased strength of polyethylene glycol dimethacrylate doped with polymethyl mechacrylate, 1675
Influence of mean stress on fatigue crack propagation in dual phase low carbon steel. The, 2629
Influence of morphology and molecular weight on ductile–brittle transitions in linear polyethylene. The, 1405
Influence of precracking load on critical stress intensity factor of mild steel, 2305
Influence of preheating gas chemistry on some properties of magnesia crucibles. The, 2497
Influence of prestrain on ductility in the superplastic Pb–Sn eutectic alloy. The, 3535
Influence of structural parameters on oxidation of austenitic Fe–Ni–Cr–Al alloys, 189
Instant colour photography: chemistry and UV stabilization, 348
Intense white photoluminescence in ZnO thin film formed by anodization, 2721
Interaction of hydrogen and the cementite–ferrite interface in carbon steel. The, 271
Intergrown perovskite–wollastonite phase in some ferrous blast-furnace slags. An, 1629
Internal oxidation in gold alloys containing small amounts of Fe and Sn, 919
Interpretation of superplastic flow in terms of a threshold stress, 582
Investigation on grain growth and strain rate sensitivity of a superplastic microduplex steel at 1000° C, 3299
Investigation on the nature of porosity in hardened cement pastes using small angle neutron scattering, An, 430
Ion sputtering and its application to biomaterials, 2531(R)
Ion-beam damage in hollandite, 1421
Ionic conductivity of Li_4SiO_4 solid solutions in the system $Li_2O–Al_2O_3–SiO_2$, 2380
IR spectra and structures of tellurite glasses, 1353
Is bone a Cosserat solid?, 1297

Kinetic aspects of the solidification of aluminium–zinc alloys, 1925
Kinetics of shear-activated indentation crack initiation in soda-lime glass, 2785
Kinetics of surface craze growth in polycarbonate exposed to normal hydrocarbons. The, 1466

Lanthanum titanium porous glass ceramic. A, 3409
Lanthanum–tantalum (Al) oxide porous glass ceramic. A, 1021
Lattice disorder and electrical conductivity of flux-grown $Ca(Wo_4)_x(MoO_4)_{1-x}$ crystals, 1359
Light induced ESR spectra in rutile powders, 2361
Local melting of nodular cast iron by plasma arc, 1773
Long-term ageing characteristics of Hastelloy alloy X, 2976

Macroscopic fracture surface energy of unidirectional metal matrix composites: experiment and theory, 3105
Magnetic moment of γ-Fe_2O_3 microcrystals: morphological and size effect, 3399
Magnetic properties of CrTe, $Cr_{23}Te_{24}$, Cr_7Te_8, Cr_5Te_6, and Cr_3Te_4 compounds, 423
Martensitic transformation in cold-worked Fe–Mn alloys studied by Mössbauer spectroscopy. The, 3661
Materials for photothermal solar energy conversion, 2487 (R)
Measurement of glass fibre strength in composites from studies of their fracture surfaces. The, 2459
Measurement of the fracture toughness of extensible connective tissues, 3591
Mechanical behaviour of polycrystalline TiC, 1983
Mechanical behaviour of TiC film coated on molybdenum by magnetron sputtering, 3099
Mechanical properties and fracture behaviour of $Zr_3–Y_2O_3$ ceramics, 1958
Mechanical properties of banana fibres (*Musa sepientum*), 2290
Mechanical properties of ductile Fe–Ni–Zr and Fe–Ni–Zr (Nb or Ta) amorphous alloys containing fine crystalline particles, 153
Mechanical properties of molybdenum coated with titanium carbide film, 3092
Mechanical properties of PVC under high pressure. The, 3063
Mechanical properties of Sn–Ag_3Sn alloys, 3143
Mechanism of crack branching in polymethyl mechacrylate and the origin of the bands on the surfaces of fracture, 687
Mechanisms of nucleation and crystallization of lithium disilicate in Li–Zn–silicate glass–ceramic fibres, 1049
Metallic foams: their production, properties and applications, 1899 (R)
Metallography and deformation of the aligned Cd–Zn eutectic Part 1 Compression. The, 930
Metallography and deformation of the aligned Cd–Zn eutectic Part 2 Tension. The, 943
Methanol crazing of coarse shear bands in polystyrene, 3047
Microanalytical investigation of sintered SiC Part 1 Bulk material and inclusions, 353
Microanalytical investigation of sintered SiC Part 2 Study of the grain boundaries of sintered SiC by high resolution Auger electron spectroscopy, 3154
Microchemistry and microstructure of a multiphase aluminosilicate ceramic, 998
Microelectronic and medical applications of an ion beam milling system, 741

Microstructural aspects of impact erosion in single crystals of LiF, NaCl, KCl and CaF_2 by blunt projectiles, 732
Microstructural aspects of moisture adsorption of Al_2O_3–B_4C compacts, 679
Microstructural characterization of doped dicalcium silicate polymorphs, 2905
Microstructural development of sub-eutectoid aged MgO–ZrO_2 alloys, 457
Microstructural effects of fatigue crack growth in a two-phase steel, 103
Microstructural studies of the hydration products of three tricalcium silicate polymorphs, 3686
Microstructure and mechanical properties of Al–$CuAl_2$ eutectic alloys solidified over a heat pipe, 1174
Microstructure and optical absorption of silver granules in oxide glasses produced by ion-exchange and reduction treatments, 250
Microstructure and phase transformations in Duplex 316L submerged arc weld metals. The, 3461
Microstructure of natural polycrystal diamond, carbonado and ballas. The, 217
Microstructure of the hydration products of tri-calcium aluminate in the presence of gypsum. The, 402
Microtopographical investigations on flux grown $ErFeO_3$ crystal surfaces, 3729
Mixed electrical conduction in sintered bcc $6Bi_2O_3 \cdot SiO_2$, 3023
Mode III and mode I fatigue crack propagation behaviour under torsional loading, 1604
Morphology and properties of polyurethane-based blends, 89
Morphology of martensite in Fe–C, Fe–Ni–C and Fe–Cr–C alloys. The, 2893
Mössbauer, EXAFS, and X-ray diffraction study of Fe^{3+} clusters in MgO:Fe and magnesiowüstite $(Mg, Fe)_{1-x}O$ – evidence for specific cluster geometries, 195

New approach to the theory of grain boundaries. A, 827
New family of tellurite glasses Part 1 Glas formation. A, 1557
New statistical model of the hydrogen embrittlement or steel. A, 3128
Non-destructive testing and acoustic microscopy of diffusion bonds, 2345
Nucleation and crystallization studies of a basalt glass–ceramic by small-angle neutron scattering, 709
Numerical determination of the parameters of Krupkowski's function for a torsion test taking into consideration the strain hardening ranges, 1323

Observations and predictions of fracture in asbestos–cement composites 2209
Observations on the fracture and deformation behaviour during annealing of residually stressed polycrystalline alumium oxides, 2135
Optical absorption and thermoluminescence of bismuth-doped NaCl single crystals irradiated with X-rays, 3072
Optical absorption near the fundamental absorption edge in some vanadate glasses, 2697
Optical microscopy of banded structures in oriented thermotropic polymers, 1136
Orientation effects in chemical etching of quartz plates, 3621
Origin of the first peak of acoustic emission in 7075 aluminium alloy. On the 1015
Overview of ion sputtering physics and practical implications. An, 1267 (R)
Oxidation of silicon nitride hot pressed with Y_2O_3 + MgO, 231
Oxidation resistance of fused TiC–C compositions containing chromium, 1213
Oxidative stabilization of oriented acrylic fibres – morphological rearrangements, 179

Pentavalent vanadium ion addition to Ni–Zn ferrites Part 1 Microstructure and grain-growth kinetics, 1583
Pentavalent vanadium ion addition to Ni–Zn ferrites Part 2 Electrical conductivity, 1934
Performance and causes of failure of polyethylene pipes subjected to constant and fluctuating internal pressure loadings. The, 1095
Phase composition and structure of boride layers grown on laboratory-cast low-chromium alloys, 3355
Phase controlled surface reaction – reaction of a monolayer at the gas–water interface, 3323
Phase transformations in dicalcium silicate, 1615
Phase transformations in Ti–V alloys Part 1 Martensitic transformations, 365
Phase transformations in Ti–V alloys Part 2 α and ω formation, 375
Physical characterization and molecular structure of hydrophilic polymers obtained by radiation cast-polymerization of methoxypolyethyleneglycole methacrylate monomers for biomedical applications, 2430
Plasma deposition and Auger studies of carbon impurities in zinc oxide, 3331
Plastic deformation and dislocation structure of single crystal mercuric iodide, 3249
Plastic flow in bcc solid solutions, 840
Potential drop across an imperfect diffusion bond. The, 2354
Power law steady state creep in α/β titanium alloys, 3449
Precipitation from metastable β-phase in the Heusler alloy $Cu_{2.66}Mn_{1.66}Al_{1.66}$, 1689
Precipitation in rapidly solidified aluminium–silicon alloys. On, 2706
Precipitation of growth ledges of planar, low energy interphase boundaries in Fe–C–X alloys, 3393
Prediction of residual strength for notched laminates. On the, 2269
Preferred hydrogen sites and hydride stoichiometry for A_6B_{23} compounds, 605
Preliminary study of precipitation in Ti^{4+}-doped polycrystalline alumina. A, 2771
Preparation and thermal degradation behaviour of a layer-type complex consisting of TaS_2 and α-napthylamine, 1089
Preparation of a crack-free and grain oriented Bi_2O_3 film with fcc structure, 1845
Preparation of titania–silica glasses by the gel method, 3137
Preparation, electrical resistivity and its temperature dependence of RuO_2–polystyrene composite powder, 1346

Presence on an iron oxide layer at the enamel/steel interface in one-coat porcelain enamelling. The, 599
Propagation of stress corrosion cracks in aligned glass fibre composite materials, 2798
Properties and structure of glasses in the system ($10K_2O \cdot 20BaO \cdot 70(SiO_2, GeO_2, B_2O_3)$), 2963
Properties of artificially grown single crystals of galena, 1625
Properties of $Na_2O \cdot 3SiO_2$ glasses impregnated with ethyl alcohol, 2453
Properties of polyethylene–propylene blends Part 3 Mechanical characterization of ultradrawn fibres, 1031
PVCz/HgS double layer structure for electrophotography, 1577

R.F.-plasma system for the production of ultrafine, ultrapure silicon carbide powder, 3190
Reaction of water with glass: influence of a transformed surface layer, 612
Reactions between silicon and nitrogen Part 1 Mechanisms. On, 951 (R)
Recovery in deformed copper and nickel single crystals, 2650
Relationship between crystal growth behaviour and constitution in the systems $LiF–LuF_3$, $LiF–ErF_3$ and $LiF–YF_3$. The, 1235
Relationship between microstructure hardness and electrical conductivity of 2219 aluminium, 3288
Removal of surface strain from rare earth intermetallic compounds by ion-beam planing, 299
Reply to 'Comment on "Craze growth and craze interactions" ', 636
Reply to 'Comments on "Long term growth of γ' particles" ', 1896
Resistivity and temperature coefficient of resistance of chromium–copper alloy films, 1028
Resolution, defect-free, electron-beam resists produced with monomer/polymer multilayer films. 50 nm, 2603
Rheology of nylon 6 containing metal halides, 2149
Rigorous determination of kinetic parameters from DTA measurements, 411
Role of Coble creep and interface control in superplastic Sn–Pb alloys. The, 562
Role of cracks in the creep deformation of brittle polycrystalline ceramics, 161

Scaling behaviour in a $\log \sigma – \log \dot{\epsilon}$ diagram. On the, 1426
Scaling relationship in the $\log \sigma – \log \epsilon$ creep and stress-relaxation curves and the plastic equation of state, 821
Scanning electron microscopy studies in abrasion of NR/BR blends under different test conditions, 515
Scanning electron microscopy studies on mechanism of tear fracture of styrene–butadiene rubber, 847
Science and technology of graphite manufacture, 3161 (R)
Second phase development in Sr-doped TiO_2, 2688
Segregation of calcium ions at the surface of magnesium oxide: theory and calculation. The, 1917
Sensitization of photoconductivity in tetragonal lead monoxide, 1912
Simulation of X-ray Laue patterns, 1083
Sintering $Al_2O_3–B_4C$ ceramics, 669
Sintering of glass bonded ceramic barium hexaferrite magnetic powders, 1331
Size effects and micromechanics of a porous solid, 2572
Solid state metal–ceramic bonding of platinum to alumina, 2835
Solid-state chemistry of new Tl_2OCl_2 and Tl_4Cl_6, 3087
Solid-state reaction of silicon nitride with an Ni-base alloy. The, 508
Solubility and susceptibility of carbonaceous quinoline-insoluble substances including mesophase material in the co-carbonization process, 3736
Some aspects of crack growth and failure in fibre reinforced composites, 1564
Some electrical properties of amorphous thin films of mixed SiO and TiO, 3377
Some observations on interactions between unstressed AISI 304L steel and zinc or zinc oxide, 471
Some properties of electron beam evaporated amorphous Mo–N films, 2126
Some studies of the optical properties of tungsten–calcium–tellurite glasses, 1255
Soviet superalloy ZHS6-K, effect of B/C modification, 1155
Spatial variation in viscosity in sheared polymer melts, 315
Statistical analysis of multiple fracture in 0°/90°/0° glass fibre/epoxy resin laminates, 2876
Steady-state creep characteristics of Ni–22 at % Cu alloy at high and intermediate temperature, 1743
Storing energy in metal hydrides: a review of the physical metallurgy, 321 (R)
Strain distribution in the superplastic Pb–Sn eutectic alloy, 2407
Straw-reinforced polyester composites, 1549
Strength and fatigue of multicomponent optical glass fibres, 785
Strength and fracture of amorphous and partially crystallized selenium, 2393
Strength–structure relationships in PAN-based carbon fibres, 3337
Strengthening of polyphase Si_3N_4 materials through oxidation, 1497
Stress corrosion cracking of GRP pultruded rods in acid environments, 1244
Stress-induced radical generation in TATB, 3243
Structural and microstructural transitions during phase separation and crystallization of $Al_2O_3–SiO_2–P_2O_5–Y_2O_3$ glass, 2108
Structural characterization of rapidly solidified white cast iron powders, 483
Structure and oxygen-barrier properties of metallized polymer film, 64
Structure in carbon/carbon fibre composites as studied by microscopy and etching with chromic acid, 973
Structure of boron in boron fibres. The, 2639
Structures and mechanical properties of an FeCo–2V alloy, 3427
Study of fracture toughness evaluation of FRP, 133
Study of optoelectronic properties of Michler's ketone/Cd(S, Se):Cu double layer system for electrophotographic applications, 3456
Study of the adhesion of drawn polyethylene fibre/polymeric resin systems. A, 533

Study of the ageing behaviour of a cobalt based implant alloy. A, 3265
Study of the electrical characteristics, before electroforming, of thin SiO_x films with laterally-spaced electrodes. A, 2777
Study of the electrical discharge coating degradation, 1151
Subcritical crack growth in ceramics as influenced by grain size and energy-dissipative mechanisms. On, 2311
Substrate effects on crystallization of polyvinylidene fluoride from solution, 3183
Superconductivity in rapidly quenched Mo–P–B alloys, 759
Superconductivity of Zr–Nb–Si amorphous alloys, 114
Superplastic flow and failure at 773 K in the aluminium–calcium eutectic alloy, 2471
Supersaturation model for the degradation of sodium β/β''-aluminas. A, 1597
Surface controlled crystallization of poly(tetramethylene terephthalate), 2969
Surface melting of a medium carbon steel by laser treatment, 1543
Surfaces for selective absorption of solar energy: an annotated bibliography 1955–1981, 3475 (R)
Swelling of slightly annealed doubly oriented samples of nylon-11 Part 1 Modification of macroscopic dimensions and long spacing, 1941
Synthesis and properties of $RbRP_4O_{12}$ crystals, 2056
Synthesis of continuous silicon carbide fibre Part 3 Pyrolysis process of polycarbosilane and structure of the products, 3633
Synthesis of iron-dispersed carbons by pressure pyrolysis of divinylbenzene vinylferrocene copolymer, 2811
Synthesis reaction of metatitanate $BaTiO_3$ Part 1 Effect of the gaseous atmosphere upon the thermal evolution of the system $BaCO_3$–TiO_2, 3041
Synthesis reaction of metatitanate $BaTiO_3$ Part 2 Study of solid–solid reaction interfaces, 3543
Systematics and nomenclature of crystallization reactions in solid alloys. On, 127

Tearing of highly oriented linear polyethylene. The, 2484
Temperature dependence of strength in a Cu_3Au–5% Ni alloy and its relevance to the APB morphology, 1881
Tempered martensite embrittlement in Fe–Ni–C steel, 3671
Tensile testing technique for fibre-reinforced composites at impact rates of strain. A, 1810
Tensile yield stress of polypropylene composites filled with ultrafine particles, 1758
Theory of yielding of amorphous polymers at low temperature – a molecular viewpoint. A, 2241
Thermal and mechanical properties of mullitic substrates for low-cost solar cells obtained by dry-pressing, 1005
Thermal conductivity of chemically vapour-deposited Si_3N_4–TiN composites, 3259
Thermally activated crystallization of $(GeSe_2)_{90}$-$(Sb_2Te_3)_{10}(GeTe)_{10}$ alloy glass: morphological and calorimetric study, 1318
Thermodynamic assessment of heat treatments for a Co–Cr–Mo alloy, 257
Thermodynamic calculation of M_s and on driving force for martensitic transformations in Fe–C. On, 3206
Thermodynamics of order–disorder transformations in vanadium carbide, 2589
Thermoelastic analysis of hybrid fabric composites, 2260
Thermostimulated depolarization currents on a glass surface in ambient gases, 2544
Thickness effect on fracture in high impact polystyrene, 657
Three-dimensional approach to the electrolytic degradation of solid electrolytes. A, 1202
Transformation behaviour of laser processed Fe–5%Cr, Fe–5%Ni and Fe–6%Cr2%Ni alloys, 2555
Transformation behaviour of the metastable phases in rapidly solidified Pd–Ge alloys, 571
Transformation structures and strengthening mechanisms of laser processed Fe–Cr alloys, 2563
Transformation toughening of β''-alumina by incorporation of zirconia, 109
Transmission electron microscopy study of hexagonal ice. A, 2752
Transport properties of strontium-doped lanthanum chromite ceramics. On some, 2095
Transverse moisture sensitivity of aramid/epoxy composites, 652

Unusual stress-corrosion cracks observed in glassy Fe–40Ni–14P–6B alloy, 1125
Use of oxidized needle-cokes in the preparation of carbon artifacts, 3705
Use of Y_2O_3 coatings in preventing solid-state Si-base ceramic/metal reaction. The, 3195
Valency compensation in the Laves system, $Ce(Co_{1-x}Ni_x)_2$, 3649
Vapour-phase ultraviolet spectra of metallo-organic precursors to III–V compounds. The, 1072
Variation of γ' particle size and volume fraction in Nimonic PE16 aged at 700° C. The, 3363
Viscoelastic characterization of poly(butylene terephthalate) using longitudinal resonances, 721

Wear behaviour of 38NCD4 N-ion implanted steel, 899
Wettability and contact interaction of gallium-containing melts with non-metallic solids, 2071
Wetting and reactions in the lead borosilicate glass–precious metal systems, 2173
Wetting of nickel by silver, 2665

X-ray diffraction analysis at high temperature on two ceramic systems, 2510
X-ray diffraction and electron spectroscopy study of metallic glass $In_{20}Te_{80}$. An, 295
X-ray diffraction methods to determine crystallinity and preferred orientation of lithium disilicate in Li–Zn–silicate glass–ceramic fibres, 1039
X-ray photoelectron spectroscopic studies of surface oxidation of metallic glasses, 173
X-ray studies on the thermal expansion of $ZnSiAs_{2-x}P_x$ ($x = 0.5, 1.5$) alloys, 145
X-ray topographic investigations of dislocations in sodium chlorate, 81

Young's modulus of Fe-, Co-, Pd- and Pt-based amorphous wires produced by the in-rotating spinning method, 2743
